

ID Force VBOX

Biometric Registration Kit

Turn any location into a biometric registration and verification office, and start registering large groups of people instantly. The device and accessories are built to operate in the harshest environments, without internet or connected to power grid.

High-quality Data capture

The 4-4-2 fingerprint scanner, camera with face capture, document scanner, and signature pad ensure high quality and quick identity registration and verification.

Fast & Accurate Identity Capture

We work with governments around the world to implement identity systems. From initial build up of a civil registers, first responders, law enforcement and military multi-modal biometric databases. On premise or in the cloud.

Go Anywhere Register Everyone!

Turn any space into a biometric registration and verification office, and start registering large groups of people instantly. The device and accessories are built to operate in the harshest environments, without internet or electricity.

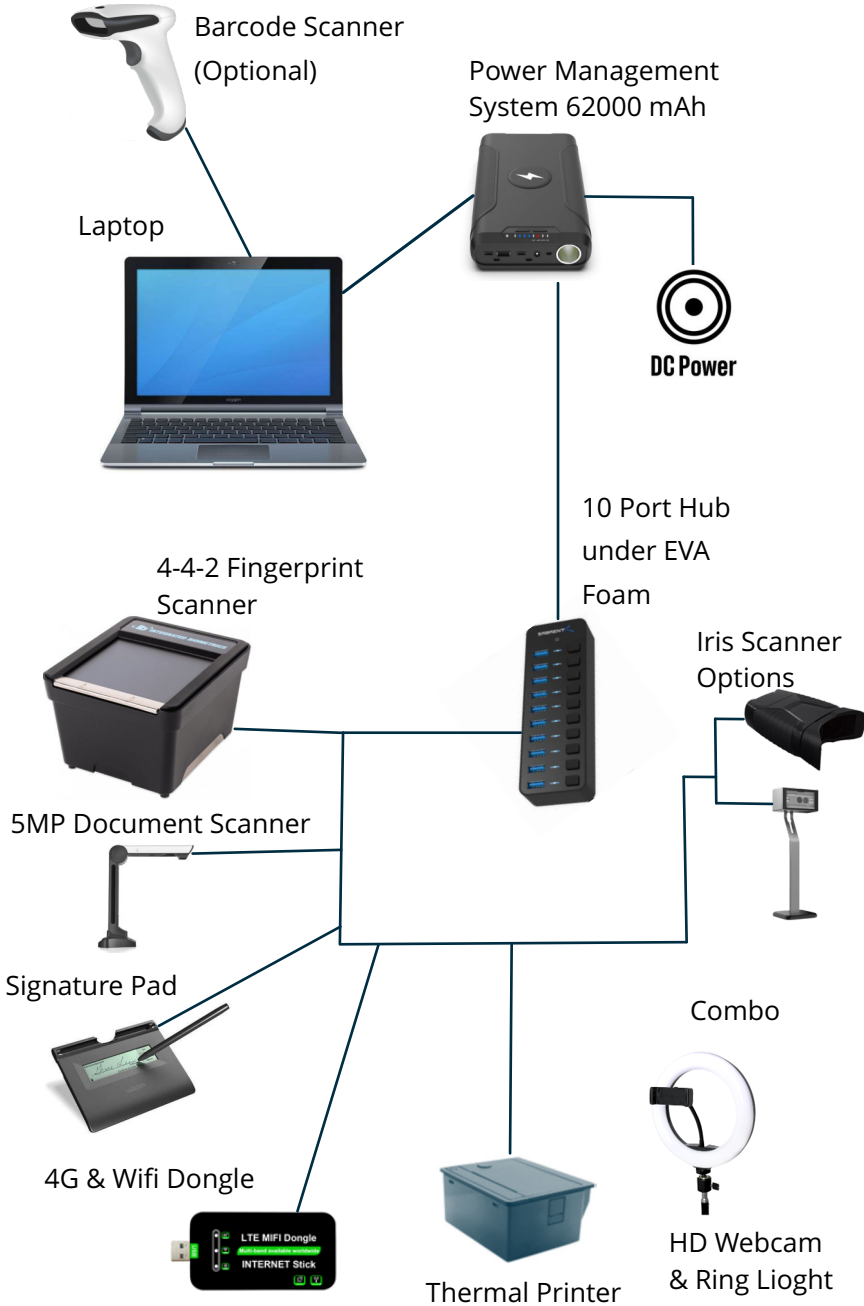

Rapid Registrations

Quickly process registrations with the large display and full keyboard. The razor-sharp display allows operators to be on top of every step of the registration process in all lighting conditions. The 2nd display allows applicants to follow the process, and confirm information.

The VBOX is a multi-modal mobile biometric registration kit. mobile
