

Regula Face SDK

PRICE LIST

Confidential. Valid from February 15, 2024

Regula Face SDK includes the following functional modules:

Face Detection

To recognize face images and return cropped and aligned portraits of the detected people along with facial attribute evaluation (age range, glasses, medical masks, etc.).

Face Comparison (Match)

To match a portrait to another reference photo (1:1) such as a printed document portrait, RFID chip DG2 portrait, selfie from an external camera (mobile/web), or an external portrait from a database.

Liveness Assessment

To ensure that a live person is applying, not a spoof or a fake.

Face Identification (Search)

To match a face image against a database of faces (1:N).

Face Image Quality Assessment

To determine whether a portrait meets certain standards, e.g. ICAO, Schengen visa, USA visa, etc., with the support of 45 Image QA parameters.

Mobile and Web Face Capture*

To add automatic capture of a user's selfie and liveness check to a website or mobile app.

*Included by default in all licenses.

You can find a full product description at <https://regulaforensics.com/products/face-recognition-sdk/> and technical details at <https://docs.regulaforensics.com/develop/face-sdk/>

Installation

- Customer-hosted Web Service; the customer will possess full control over the data flow & storage.
- No personal data transmission to 3rd-party networks, which guarantees data privacy compliance.
- Connection to Regula Online Licensing Server is required for transactions count and license validation.

License Information

- Per-project licensing (per on-prem installation).
- License validity: 12 months / until included TRX batch is consumed (whichever comes first).
- Support and Maintenance is included in the license price.
- 24/7 support is available by request.
- If the included TRX batch is used sooner, the customer will need to cover the rest of the 12-month period based on the TRX price of the Tier.
- If the included TRX batch is not used by the first anniversary, the counter is reset and a new License will be required.
- To prevent production stoppages, usage in excess of the prepaid volume is allowed, but not more than 50% of purchase transaction volume.
- We apply a +10% surcharge for invoicing volumes in excess of prepaid volumes.

Please contact your account manager if you have any questions.
